

Inspired by MartinLogan’s ultra-high-end electrostatic loudspeakers, the Motion® Series was created to provide stunning sound for your ultimate-performance home theater or stereo.

MartinLogan’s dedicated in-house engineers carefully crafted the Motion Series to create an extremely affordable and compact product line that seamlessly blends our exquisite Folded Motion™ transducers with powerful, bass technology. The result is a smooth, refined sound with stunning dynamic range and jaw-dropping clarity. Included here are just a few of the outstanding awards and accolades the Motion Series has received.

“They can reach blazing loud levels without losing composure. If I had a more powerful amplifier, I think I could have pushed them even harder than I did. If you need bookshelf speakers that can rock hard, these are a great choice.” – **James Larson**

“What you get is a serious value for your money. Beautiful, thoughtfully designed speakers with a sound that begs you to plant yourself on the couch and watch movies for hours on end. And that might be the only negative point, you might need to budget in the additional cost of a personal trainer, to get your ass off the couch.” – **Taps Das**

AVS FORUM

February 2019

<http://bit.ly/2fFPbIK>

"When space is at a premium, but you
refuse to cut corners when it comes to audio fidelity, a system
comprised of MartinLogan's Motion 4i, 8i and Dynamo 800X
is a solution that I enthusiastically recommend."

- Mark Henninger

"Just as MartinLogan has done with their
hybrid ESL speakers, the seamless blend
between the Motion tweeter and the woofer feels like you
are listening to a full range speaker. There is a level of
transparency here that just doesn't happen with other budget
small speakers and that's impressive." **- Jeff Dorgay**

"After listening to the Motion 4i, I can attest that this is a very cool little speaker. There are several features the wizards at MartinLogan packed into the speaker that influences its ultimate final sonic signature, but before we dig into that, it's worth asking: what is this speaker, anyway? Is it a near-field monitors for musicians and recording engineers? Is it a good right and left option in an audiophile 2.1 system? Is it good for the right, left, and surround duties of a surround sound system? Is it an option for a computer playback system? The answer to all of the above: yes, yes, yes, and yes!" – **Scott Schumer**

"I was already a fan of MartinLogan products, loving their speakers such as the \$80,000 Neolith, but wasn't sure how much the quality trickled down into the lower-priced products. Consider me impressed. I have not seen many products in these price ranges that can compete, and certainly none that look as good." – **Michael Laurance**

"If you're not familiar with the original Motion Series speakers, their performance can best be summed up in two words: "detailed" and "dynamic." Much like the originals, the amount of sound coming out of these little cabinets is a bit startling." – **Dennis Burger**
